Adler University (Chicago, IL)

Accredited by the APA? Yes

The Emphasis in Traumatic Stress Psychology was developed and launched in 2009 and has been approved as a Concentration/Emphasis by the Higher Learning Commission and the Illinois Board of Higher Education.

Degree Program level - PsyD program in Clinical Psychology, Emphasis in Traumatic Stress Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Janna Henning, Psy.D., F.T. jhenning@adler.edu	Trauma education and training, interpersonal violence, sexual assault, social class and trauma transgenerational trauma, vicarious traumatization and burnout, dissociation, chronic and life-threatening illness and end of life, traumatic loss

Current Course Names

- Trauma-Focused Interventions
- Advanced Trauma-Focused Interventions
- Death, Dying, Bereavement, & Loss-Focused Interventions
- Advanced Issues in Co-Occurring Disorders

The Emphasis in Traumatic Stress Psychology is a set of focused elective courses for students in the Doctorate in Clinical Psychology Program at Adler University who are seeking specialized training to provide clinical services for individuals with symptoms of traumatic stress, including people who have experienced combat, disasters, accidents or life-threatening illness, or interpersonal violence.

Course Offerings

The courses prepare students to provide these individuals with evidence-based and evidence-informed clinical services and the support they need to improve their psychological, physical, social, and vocational functioning. The broader structural and systemic factors that impact

survivors' well-being, cultural factors that exacerbate or ameliorate dysfunction, and clinicians' management of countertransference reactions and recognition, prevention, and treatment of compassion fatigue and vicarious traumatization are addressed.

Practicum Placements

Students earning the Emphasis in Traumatic Stress Psychology must complete at least one of their practica and/or internship years at a site that offers significant experience in working with survivors of traumatic events; students have the opportunity to be placed in a wide range of training settings that serve trauma-exposed individuals.

Note: Students earning the Emphasis in Traumatic Stress Psychology must also complete a dissertation on a topic relevant to traumatic stress, death, dying, bereavement, or loss, suicide, or chronic/life-threatening illness.

Case Western Reserve University (Cleveland, OH)

Accredited by the APA? Yes
Degree Program level - Ph.D.

Research Opportunities - PTSD Treatment and Research Program

The PTSD Treatment and Research Program is a team of insatiably curious individuals dedicated to carrying out strong, interdisciplinary science and delivering compassionate, evidence-based care. We aim to close the gap between research and practice through working to better understand the psychological and biological principles underlying trauma-related risk and resilience, treatment optimization, and the dissemination and implementation of evidence-based treatments to ultimately improve access to quality care.

Course Offerings

Course Name	Instructor
Advanced Psychotherapy Seminar – includes training in exposure therapy for anxiety and trauma-related disorders	
Workshop opportunities in prolonged exposure therapy	Norah Feeny, Ph.D.

Practicum Placements

Training Opportunities	Supervisor
Practicum placements involve training and supervision in the delivery of prolonged exposure (PE)	Norah Feeny, Ph.D.
VA placements may also be available, which offer opportunities for trauma-focused training

Lisa Faille, Ph.D.	<p>Violence prevention, racial/gender biases, emotional regulation</p>

Ken Fogel, Psy.D.	Topics in psychological assessment, especially projective techniques, ambivalence in psychotherapy and interpersonal relationships, neurobiological bases of behavior, trauma and posttraumatic stress disorder, prescription privileges for psychologists
Robert Foltz, Psy.D.	Child / adolescent psychopathology, psychopharmacology, the psychological & neurological impact of trauma, and critical evaluation of evidence-based treatments; Recent research included the Adolescent Subjective Experience of Treatment study, which involved assessing youth, currently placed in residential treatment, on what they perceive as the most effective (and ineffective) components of multidisciplinary care, areas of inquiry included psychotropic medications, psychotherapy, and milieu treatments, also assessed levels of trauma, strength-based strategies, and measures of resiliency
James Galezewski, Psy.D.	Career/Workplace Issues, Work/Life Balance, ADD/ADHD, Anxiety Disorders Learning Disabilities, Post-Traumatic Growth, Psychopathology, Stress/Coping, Trauma/PTSD, Marriage & Family, Divorce, Family Therapy, Mood Disorders, Depression, Therapeutic/Theoretical Orientation: Brief Therapy, Cognitive-Behavioral Therapy, Family Systems Theory
Bobbie Gallagher, Ph.D.	Sexuality, increasing access to medical care for vulnerable populations, anxiety, trauma and autism, social validity measures, challenging behaviors, parent training, culture and programming, program evaluation
Sarah Golomb, Ph.D.	Interdisciplinary collaborations in graduate education, with a particular focus on issues of child maltreatment and childhood trauma, the ethical assessment of culturally and linguistically diverse students
Emma Grace, Ph.D.	Global mental health and trauma, humanitarian mental healthcare, mass psychogenic illness, mass violence, forced displacement, revenge ideation, radicalism, suicide terrorism

Evan Harrington, Ph.D.	Business/IO Psychology, Survey Development, Diversity, Social Justice and Advocacy, Domestic Violence, Sexual Abuse Ethical & Legal Issues, Adverse Impact Forensic Psychology, Eyewitness Memory/Recovered Memory, Murder/Provocation Defense Psychology, Social Psychology, Research Design/Methodology, Statistics
Leigh Holman, Ph.D.	Working with trauma and abuse and resulting mental health issues including interpersonal challenges and attachment issues, mood and anxiety disorders, post-traumatic stress disorder, addictions, and offending behaviors
Denita Hudson, Ph.D.	The impact of Adverse Childhood Experiences on older adults, career development, and the African American community
Nadia Jones, Ed.D.	Child & Adolescent Development, Adolescence, Discipline, Parenting Styles, School Issues (Bullying), Clinical Psychology / Mental Health, Anxiety Disorders, Cognitive Behavioral Therapy, DSM/Diagnosis, Mood Affective Disorders / Suicide, Oppositional-Defiant Disorders, Phobia, Post-Traumatic Growth, Self-Injury, Stress/Coping, Trauma/PTSD, Diversity, Acculturation, Community Mental Health, Cultural Issues, Diversity Issues, Immigration/Immigrant Issues, Latino/a Mental Health, Religion and Spirituality, Domestic Violence, Child Abuse, Sexual Abuse, Marriage & Family, Blended Families, Divorce, Family Reunification, Family Therapy, Foster Care, Mediation, Parenting, Relationships and Dating, Mood Disorders, Depression, PTSD/Trauma, Post-Traumatic Stress Disorder, Therapeutic/Theoretical Orientation: Cognitive-Behavioral Therapy, Family Systems Theory, Humanistic/Existential, Multicultural psychology, Object Relations, Positive Psychology, Relational Cultural Therapy
Kristin Kenefick, Psy.D.	Parenting, Trauma, International Psychology, Wellness, and Integrative approaches to therapy

Clive D. Kennedy, Ph.D.	Domestic violence in families of Color, substance abuse, AIDS prevention/treatment issues, cross-cultural relations, and other stress, mental health, and forensic psychology related issues
Cynthia Langtiw, Psy.D.	Spirituality/religion, diversity, multicultural competence, supporting unhoused/vulnerable/marginalized youth, migration/immigration/asylee mental health, expressive/arts based therapies, spirituality and religion, radical self-care, and (Haitian/American) identity development; Volunteer clinical supervisor with the Chicago-based Marjorie Kovler Center for Survivors of Torture
Victoria Liu, Ph.D.	Addiction/Substance Abuse, Contingency Management, Child & Adolescent Development, Cognitive Development, Identity Development, Parenting Styles, School Issues (Bullying), Social Development, Diversity, Acculturation, Community Mental Health, Cultural Issues, Diversity Issues, Ethnic Identity Development, Gender Issues, Class, GLBT Identity Models, Identity Development, Immigration/Immigrant Issues, Multicultural Training, Oppression, Racism, Sexism, Social Justice and Advocacy, Marriage & Family, Collaborative Parenting Couples Counseling, Family Therapy, Parenting, Relationships and Dating, PTSD/Trauma, Crisis Intervention, Historical Trauma, Research Design/Methodology, Mixed Methods Research, Sexuality/Gender Issues, Gender Identity, LGBTQ, Therapeutic/Theoretical Orientation: Constructivist/Narrative Theory, Family Systems Theory, Feminist Psychology, Violence, Bullying
Sarah Livermore, M.A. LMFT	Supporting foster children and families, educating the public about trauma and the impacts of trauma on the body and brain, providing treatment for PTSD and trauma with EMDR therapy, and helping people in every stage of life have healthy and fulfilling relationships

Beatriz Lopez, Ph.D.	Multicultural mental health, clinical training of graduate students, and adult treatment of trauma
Mark MacMillin, Psy.D.	Attachment theory, ACES (adverse childhood experiences), forgiveness and the interface of spirituality and clinical psychology
Frances McClain, Ph.D.	Addiction/Substance Abuse, Co-occurring Disorders, Clinical Psychology / Mental Health, Anxiety Disorders, Disaster Mental Health, DSM/Diagnosis, Mood Affective Disorders / Suicide, Psychopathology, Psychotic Disorders, Diversity, Community Mental Health, Diversity Issues, Multicultural Training, Mood Disorders, Bipolar Disorder, Depression, Dysthymia, PTSD/Trauma, Post-Traumatic Stress Disorder, Sexuality/Gender Issues, HIV/AIDS, LGBTQ, Therapeutic/Theoretical Orientation: Constructivist/Narrative Theory, Family Systems Theory, Violence, Sexual Assault
Pip McGirl, Ed.D.	Autism/Developmental Disorders, Asperger's, Autistic Spectrum, Child & Adolescent Development, Adolescence, Cognitive Development, Discipline, Identity Development, Learning/Learning Disabilities, Parenting Styles, School Issues (Bullying), Social Development, Marriage & Family, Parenting, Neuropsychology/Neuroscience, Applied Neuroscience, Counselor Education, Educational Psychology, International Psychology, Positive Psychology, School Psychology, PTSD/Trauma, Crisis Intervention, Post-Traumatic Growth, School Psychology, Academic Interventions, Cognitive Assessment, International School Psychology, School Supervision, Systems Change, Post-Traumatic Growth, Vicarious Trauma, Therapeutic/Theoretical Orientation: Brief Therapy, Developmental Psychology, Positive Psychology, Solution-Focused Counseling, Therapy, Violence, Bullying
Breeda McGrath, Ph.D.	Child development, social-emotional learning, trauma-informed care, educational disabilities, legal issues, and training; Anxiety, mood disorders, self-injury, cognitive behavioral therapy, cross-cultural

	considerations, assessment and psychological evaluation; Academic interventions, cognitive assessment, bullying, school violence, school supervision, school law and ethics, systems change, and international school psychology; Bipolar disorder, anxiety, depression, dysthymia, PTSD/trauma, crisis intervention, diversity issues, immigration, and identity development
Bret Moore, Psy.D.	Psychopharmacology, Military psychology
Shauna Moore Reynolds, Ed.D.	Anxiety, Depression, Crisis, Trauma, Post-Traumatic Stress, Sexual Assault and Domestic Violence
Shavonne Moore-Lobban, Ph.D.	The assessment and treatment of trauma, working with individuals with severe and persistent mental illness, providing services to marginalized communities. Her research aligns with her clinical areas of expertise and utilizes a multicultural framework as a base for exploration. Dr. Moore-Lobban is also involved with multiple education and advocacy efforts to end sexual victimization against women and men.
Luke Mudd, Psy.D.	abuse (child, domestic, partner), addiction, anger, anxiety, bipolar disorder, bullying, children, adolescent, families , clinical psychology, cognitive/cognitive behavioral therapy, community mental health, conflict resolution, couples counseling, depression, domestic partnership rights, gangs, leadership, marriage and family therapy, mental illness, mood disorders, multicultural training, personality disorders, positive psychology, psychological testing, psychopathology, psychotherapy, psychotic disorders, relationships/dating, school violence, stress, trauma, violence, work/life balance
Nahid Nasrat, Psy.D.	Diversity issues in clinical psychology, including refugees and immigrant's mental health as well as psycho-social issues in conflict and post-conflicts countries
Reema Obaid Ross, Psy.D.	Training and supervision as well as clinical work with children and families, underserved populations, trauma and attachment theory
Anita O-Conor, MSW	Healing and treating trauma, securing justice for survivors, developing trauma informed

	systems and training students and professionals on traumatic stress. She is currently lead faculty for the trauma concentration in the Counseling Psychology department. Ms. O'Conor utilizes a systems and strength-based approach, within the context of trauma exposure primarily resulting from human rights violations.
Ruth Ouzts Moore, Ph.D.	Counseling children and adolescents, particularly those who have experienced abuse and trauma; abuse/trauma, play therapy, high-conflict divorce/parental alienation, courtroom testimony, and creative counseling techniques
Joyce Nugent-Hirschbeck, Psy.D.	The treatment of Schizophrenia, Borderline Personality Disorder, & vocational barriers in the Chronic Mentally Ill population
Bina Parekh, Ph.D.	Pain management, obesity treatment, biofeedback, trauma, couples counseling, addiction medicine, general psychiatry, and multicultural counseling
Viviane Pecanha, Ph.D.	Cognitive behavioral therapy, working to increase public awareness of addictive behaviors and related consequences such as trauma and violence
Patricia Perez, Ph.D.	child abuse and neglect, family and trauma, multigenerational issues of violence, children with emotional and behavior disorders, children with special needs, parenting within a cultural context, diversity issues across the lifespan, cultural psychology, multicultural psychology, and cross-cultural psychology
Ricardo Phipps, Ph.D.	spirituality in counseling, multicultural counseling perspectives, and trauma-oriented counseling
Christina Pinard, Ph.D.	Diversity, Ageism, Diversity Issues Domestic Violence, Sexual Abuse, Research Design/Methodology, Qualitative Inquiry Sexuality/Gender Issues, HIV/AIDS, Violence, Bullying, Professional Skills, Human Trafficking, Health Promotion
Lynette Pujol, Ph.D.	Anxiety Disorders, Cognitive Behavioral Therapy, Mood Affective Disorders / Suicide, Clinical Psychology / Mental Health, Psychopharmacology, Stress/Coping,

	PTSD/Trauma, Post-Traumatic Stress Disorder
Virgina Quinonez, Psy.D.	LGBTQ issues, Latinx mental health, immigrant mental health, women's issues, trauma treatment and minority students in higher education
Cris Scaglione, Ph.D.	Neuropsychology, doing assessments, rehabilitation, and therapy with survivors of head injury, stroke, and other neurological impairments. She works with and gives presentations on the neurocognitive aspects of psychological trauma and addiction. She has worked with chronic mentally ill older adults, as well as learning-disabled and dual-diagnosis children and adults, including veterans.
Edward Shearin, Ph.D.	Personality disorders, eating disorders, suicidal and self-injurious behavior, and psychotherapy process, DBT
Heather Sheets, Psy.D.	Child & Adolescent Development, Social Development, Social Development, Ethical & Legal Issues, Code of Conduct for Psychologists, Mood Disorders, Bipolar Disorder, Depression, Dysthymia, Clinical Psychology, Developmental Psychology, PTSD/Trauma, Post-Traumatic Stress Disorder, Sexuality/Gender Issues, Gender Identity, Therapeutic/Theoretical Orientation: Brief Therapy, Interpersonal
Mirsad Serdarevic, Ph.D.	Cultural diversity, culturally-sensitive clinical interventions, motivational interviewing, substance use disorders, psychotherapy with older adults, psychopathology, PTSD, primary care and behavioral and psychopharmacology treatments, and bereavement
Mike Sherman, Psy.D.	His goal is to broaden the capacity of providers, programs, and systems to foster children's social, emotional, and behavioral health and development. Child Development, Infant and Early Childhood Mental Health, Child Trauma, Childhood Adversity, Systems of Care, Primary Prevention, Program Development and Evaluation
John Shustitzky, Ph.D.	Addiction and Substance Abuse, Chronic mental illness, Community Mental Health,

	Domestic violence, Ethics in Professional Psychology, Integrating Primary and Behavioral Healthcare, Organizational Psychology, Political Advocacy, Positive Psychology, Violence
Annemarie Slobig, Psy.D.	Intrapsychic humanism, Child & Adolescent Development, Parenting Styles, Clinical Psychology / Mental Health, Post-Traumatic Growth, Trauma/PTSD, Sexuality/Gender Issues, LGBTQ
Lori Soli, Ph.D.	Grief, Loss, Trauma, Crisis Team, Self-care, Clinical Assessment, Student Engagement, CMHC, Clinical Training, Multiculturalism, Leadership, School Counseling
Drake Spaeth, Psy.D.	religious and spiritual issues in psychotherapy, contemporary nature spirituality, ecopsychology, humanistic/existential approaches to counseling and psychotherapy, constructivist philosophy and psychology, lifespan development, trauma and secondary traumatization, social psychology, and violent/criminal behavior
LoriAnn Stretch, Ph.D.	distance counseling and supervision, law and ethics, evidence-based practice, and the developmental process of becoming a therapist; vocational rehabilitation, domestic violence/sexual assault support, court advocacy, college/university counseling, disability services, foster care group homes, child support services, clinical supervision, and private practice
Jeff Strozier, Ph.D.	Addiction/Substance Abuse, Co-occurring Disorders, Clinical Psychology / Mental Health, Schizophrenia, Domestic Violence, Same Sex Domestic Violence, Sexuality/Gender Issues, LGBTQ Violence, Hate/Bias Crimes
Ryan Tobiasz, Psy.D.	Addiction/Substance Abuse, Co-occurring Disorders, Clinical Psychology / Mental Health, Assessment/Psychological Testing, Cognitive Behavioral Therapy, Cognitive Disorders, Comorbid Disorders, Mood Affective Disorders / Suicide, Personality Disorders, Psychopathology, Psychotic Disorders, Schizophrenia, Self-Injury,

	Stress/Coping, Substance-Related Disorders, Trauma/PTSD, Diversity, GLBT Identity Models, Forensic Psychology, Correctional Psychology, Malingering, Prisons, PTSD/Trauma, Crisis Intervention, Sexuality/Gender Issues, Gender Identity LGBTQ
Kim Vander Dussen, Psy.D.	Child and Adolescent Psychopathology, Child Therapy, Play Therapy, Developmental Trauma, PTSD, Development
Debra Warner, Psy.D.	Forensic psychology, community gang intervention and violence with the support of law enforcement and mental health organizations; male survivor issues of abuse, violence and trauma; diversity issues, personality disorders, sexual offenders, sexually abused children, stereotypes, substance abuse, testing issues, work/life balance, workplace issues
Nancy Zarse, Psy.D.	Clinical Psychology / Mental Health, Psychopathology, Trauma/PTSD, Domestic Violence, Spousal/Partner Abuse Forensic Psychology, Correctional Psychology, Police, Violence, (See Domestic Violence) Murder, School Violence, Terrorism

East Washington University (Cheney, WA)

Accredited by the APA? No

Degree Program level -

Course Offerings

Course Name	
Trauma – Theory, Assessment, & Treatment	Note: offered at the undergraduate and graduate level

Website: <https://catalog.ewu.edu/search/?search=trauma+>

Emory University (Atlanta, GA)

Accredited by the APA? Yes

Degree Program Level – Ph.D in Psychology – four concentrations offered (can affiliate with more than one area): Behavioral and Systems Neuroscience, Clinical Science, Cognitive and Computational Science, Developmental Science

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Patricia Brennan, Ph.D	Biological, psychological, and social risk factors for internalizing and externalizing disorders from a developmental psychopathology perspective. Perinatal maternal health, psychosocial stress and

	trauma, and intergenerational transmission of risk
Robyn Fivush, Ph.D	early memory with an emphasis on the social construction of autobiographical memory and the relations among memory, narrative, identity, trauma, and coping; Early emergence of autobiographical memory, with an emphasis on the ways in which families reminisce about past experiences together. Particular interest in the developing relations among autobiographical narratives, emotional and social understanding, and coping with stressful and traumatic events.
Abigail Lott, Ph.D.	Understanding the long-term impact of interpersonal trauma exposure (e.g., childhood maltreatment, domestic violence) and how emotion dysregulation relates to psychiatric outcomes
Negar Fani, Ph.D.	Understanding the intersection of emotion and cognition in those with PTSD
Nadine Kaslow, Ph.D.,	Intimate partner violence and suicidal behavior
Andrew Kazama, Ph.D	Conducts translational research focused on understanding the neurobiological basis of PTSD; Neurobiological basis of safety signal processing, which is implicated in several anxiety-related neuropsychiatric disorders. The scope of this research includes: investigations of the various brain structures thought to be involved in these processes, the developmental progression of these abilities, investigating the role of diet and socioemotional factors contributing to emotion regulation.

Course Offerings

Course Name
PSYC 340: Crime & Criminal Behavior
PSYC 341: The Psychology of Evil
PSYC 614: Memory
PSY 385R: Special Topics in Psychology – Neurobiology of PTSD

Fuller Theological Seminary (Pasadena, CA)

Accredited by the APA? Yes

Degree Program level – PsyD / PhD

Research Opportunities, Course Offerings, and Practicum Placements:

Fuller Theological Seminary, Graduate School of Psychology includes opportunities for research, clinical training, and coursework in trauma and traumatic stress. Fuller's PsyD and PhD in Clinical Psychology programs are APA Accredited and use a training model that integrates Christian theology and spirituality within the APA competencies needed for psychological practice. Three trauma-related courses are offered: (a) *Advanced Cognitive Behavioral Therapies* that incorporates training in Trauma-Focused CBT (taught by [Dr. Sean Love](#)), (b) *Vulnerable Family Systems* that addresses trauma care for marginalized groups (taught by [Dr. Lisseth Rojas Flores](#)) and (c) *Trauma and Faith* that integrates psychological theory of trauma and issues of spirituality and meaning (taught by [Dr. Cynthia Eriksson](#)). Several faculty members mentor research on trauma-related topics (Dr. Rojas Flores: community violence in Latin America, deportation trauma; Dr. Eriksson: vicarious trauma, spirituality, and international trauma; [Dr. Jenny Pak](#): culture and trauma; and [Dr. Sung H. Kim](#): assessment and TBI in veteran samples). The Los Angeles area allows for clinical training opportunities in a variety of settings that serve survivor populations, including 5 VA clinics (West Los Angeles, Long Beach, Sepulveda, Loma Linda, and Los Angeles Ambulatory Care Center), Community Mental Health clinics (Pacific Clinics, Child and Family Guidance), forensic settings (Patton State Hospital) and University Counseling Centers (USC, Azusa Pacific University).

John Jay College of Criminal Justice (New York, NY)

Accredited by the APA? Yes (Ph.D. in Clinical Psychology only)

Degree Program Level – M.A.-J.D. in Forensic Psychology and Law (NY Law School & Cuny Law School programs); M.A. in Forensic Psychology; Ph.D. in Clinical Psychology; Ph.D. in Psychology & Law

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
-----------------------	---------------------------

Cynthia Calkins, Ph.D.	Establishing empirical evidence for use in sex offender policy and sexual violence prevention; Primary sexual violence prevention; Identifying risk markers for sexual violence perpetration among a sample of clergy sex offenders; Longitudinal study examining factors promoting desistance from sexual offending; The examination and prevention of sexual violence in Latino cultures
Emily Edwards, Ph.D.	Treatment and theory for persons with emotion processing and emotion regulation difficulties; Adapting treatments for individuals with severe personality disorders and for forensic contexts; Posttraumatic stress and alexithymia
Miriam Ehrensaft, Ph.D.	The association of developmental psychopathology with the risk for interpersonal violence; Longitudinal studies of the intergenerational transmission of antisocial behavior and intimate partner violence; The influence of family violence, parent-child relationships, and poverty on the transmission of problem behavior across generations
Jason S. Frydman, Ph.D.	Trauma-informed drama therapy; Creative arts therapy; Working with individuals across the age spectrum who have been adversely impacted by traumatic events
Michele Galletta, Ph.D.	Treatment of violence: Self-harm and suicide in correctional, forensic & civil settings; Stalking and interpersonal violence; Palliative care in correctional settings; Treatment of psychopathy; Training and supervision; Child sexual abuse by Catholic clergy; DBT
Gwendolyn L. Gerber, Ph.D.	Gender issues in forensic psychology; Police psychology; Gender stereotyping; Sexual assault
Veronica Johnson, Ph.D	Strengths-based approaches to mental health service delivery for client populations of color; Enhancing mental health treatment for racial/ethnic minority clients by isolating cultural values that promote psychosocial being, rather than focusing on the perceived deficits of client populations of color; Racial trauma; Workplace racial discrimination; Racism-related coping; Racial socialization
Elizabeth Jeglic, Ph.D.	Sexual violence prevention; The assessment and treatment of those who have committed sexual offenses; Developing evidence based

	public policy; The primary prevention of sexual violence and the dissemination of sexual violence prevention research to the public; The role of treatment in criminal justice reform; Suicide prevention, particularly among youth and emerging adults; Cognitive behavioral therapy and its application to criminal justice involved populations
L. Thomas Kucharski, Ph.D.	Forensic psychological evaluation; The detection of malingering and denial; Clemency in death penalty cases; Characteristics of those wrongfully convicted in capital cases; The mental health of victim's family members; The effects of supervision and treatment in sex offender recidivism
Casey LaDuke, Ph.D.	Forensic mental health assessment; Violence & crime prevention; Neuroscience & neuropsychology; Mental illness; Racial & social justice
Keith A. Markus, Ph.D	Causal models and causal inference; Test validity; Statistical inference; Applications of latent variable modeling; Discursive psychology; Organizational culture; Partner abuse; Deception detection; Language; Logic; Ethics; Policing; Jurisprudence
Silvia Mazzula, Ph.D.	Racial trauma; Multicultural competencies in research and practice; Social networks for diverse academic pipeline development; Latino Psychology; Directs a research lab and collaborates with various inter-disciplinary research teams throughout the United States; Her lab focuses on advancing the study of race and culture in psychology, examining the experience of marginalized populations (e.g., racial minorities, women, immigrants) and how to improve treatment that is culturally relevant to their lived experiences and worldviews, paying particular attention to socio-cultural identities (e.g., gender, ethnicity, race, social class) and race and culture as psychological and subconscious processes of human thought and behavior
Kelly McWilliams, Ph.D.	Child sexual abuse & maltreatment disclosure, memory, & eye-witness testimony; Trauma-related psychopathology;

	Wrongful acquittals of sexual abuse; Attachment
Kevin L. Nadal, Ph.D.	Impacts of microaggressions (or subtle forms of discrimination) on the mental health of people of color, women, lesbian/gay/bisexual/transgender/queer (LGBTQ) individuals, and other marginalized groups; Filipino American mental health and issues affecting LGBTQ people of color; Traumatic stress and the effect of microaggressions on LGBTQ people of color
Chitra Raghavan, Ph.D.	Coordinator of Victimology Studies in Forensic Psychology*; Power dynamics in intimate partner abuse, sexual assault, sex trafficking and related traumatic outcomes; Applying Eastern Psychological principles to forensic psychology; Intimate partner violence, sex trafficking, coercive control, trauma, and trauma bonding
Krystel Salandanan, Psy.D.	Behavioral therapies; Mindfulness-based techniques; Behavioral medicine/health psychology; Multicultural psychology; Clinical interest in personality disorders, trauma, emotion regulation disorders, chronic disease management, and working with historically marginalized communities of color
C. Gabrielle Salfati, Ph.D.	Investigative Psychology; The empirical analysis of violent criminal behaviour, in particular the advancement of the science of offender profiling and linking serial crimes; The methodology of research in offender profiling and linking serial crimes, specifically with a focus on interpersonal violence and victimization patterns in homicide and violent sexual crimes; This work is being developed within an international framework through collaboration with law enforcement agencies internationally
Louis Schelsinger, Ph.D.	Sexual and serial murder, serial and non-serious sexual murder, mass murder, crime scene behavior, rape, bias homicide, suicide-by-cop, and other extraordinary crimes
Marina Sorochinski, Ph.D.	Investigative psychology; Applying psychological principles and rigorous empirical methods to improving police

	investigations in serious violent crime; Profiling and behavioral linkage in serial violent crime
Barbara H. Stanley, Ph.D.	Suicide, suicidal behavior, non-suicidal self injury, BPD, depression, Dialectical Behavior Therapy, Cognitive Behavior Therapy, brief interventions to prevent suicide, biobehavioral research on suicidal behavior and BPD; Mentored research on fMRI studies examining the interpersonal dysfunction dimension of BPD, genetics studies of BPD and treatment engagement trials with suicidal individuals
Deryn Strange, Ph.D.	The causes and consequences of distorted memories for traumatic events; The techniques that elicit false personal—autobiographical—or false collective memories and whether those false memories can be corrected; Legal implications of memory distortion
Rebecca Weiss, Ph.D.	The effect of group membership (e.g., culture, intellectual disabilities) on validity in psychological assessment; The impact of trauma on the treatment and development of aggression and substance use disorders
Cathy Spatz Widom, Ph.D.	The long-term consequences of child (physical and sexual) abuse and neglect; the cycle of violence; The intergenerational transmission of child abuse and neglect
Peggilee Wupperman, Ph.D.	Treatment for individuals with dysregulated emotions and behaviors (often known as impulsive, addictive, or self-destructive behaviors); Evaluating and disseminating a transdiagnostic psychotherapy (Mindfulness and Modification Therapy; MMT) developed to target dysregulated behaviors; Exploring constructs underlying emotion and behavior dysregulation; Investigating the effects of mindfulness and emotion-regulation skills on mental health and well-being; Childhood/adult trauma & abuse; mental illness; Opioids/controlled substances; Sexual violence/intimate partner violence; Women/gender justice

Course Offerings

****Certificate of Victimology Studies in Forensic Psychology***

The Victimology Studies in Forensic Psychology is a 12-credit certificate program which aims to develop specialized knowledge in the area of interpersonal victimization in a forensic psychology context. Areas covered include but are not limited to interpersonal violence and victimization including domestic violence, sexual assault, sexual harassment, child abuse, sex and labor trafficking, and hate crimes. This non-licensable certificate will allow BA graduates working in Victim Services agencies to develop a better understanding of relevant issues, and to possibly consider additional training. It will also be available for those already in our MA Programs, who can concurrently receive the Certificate along with their MA, to demonstrate some focus in this area. The core courses are PSY 700: Mental Health Professionals, Social Science, and the Law; PSY 705. Victimology; PSY 742. Family Violence and Disputes; and PSY 733. Dissociation and Trauma.

Faculty Member	Research Interests
Holly Orcutt, Ph.D.	<ul style="list-style-type: none">• Identifying risk factors that operate to increase individual vulnerability to PTSD following exposure to traumatic events.• Identifying factors that mediate the link between trauma exposure and increased risk for subsequent trauma exposure.• Identifying factors that increase or reduce sexual risk-taking behavior.• Experiential avoidance, psychological acceptance, mindfulness and self-compassion.• Fear conditioning/fear-potentiated startle.
Michelle Lilly, Ph.D.	Cognitive and emotional processes that predict PTSD in two populations: survivors of interpersonal trauma and 911 telecommunicators, complex post-traumatic clinical presentations, including the development of comorbid conditions such as depression, dissociation and somatization, developing mindfulness-based and metacognitive interventions for emergency responders and campus veterans, with an emphasis on examining mechanisms that may be responsible for treatment-related change
Laura Pittman, Ph.D.	How family and school contexts may buffer the risk of developing psychological symptoms after experiencing these natural disasters

David P. Valentiner, Ph.D.	Cognitive and emotional factors related to anxiety, anxiety disorders, and change in anxiety during treatment and during the natural recovery following trauma, such as mechanisms of change in effective therapies for anxiety disorders, mechanisms for understanding psychopathology, including etiology and maintenance, and how can treatment and prevention be improved based on what we learn about mechanisms of change. Interest in brain areas involved in fear reduction and recovery, racism and belief change, and research on pseudoscience and scientific anomalies.
----------------------------	---

Course Offerings

Course Name
PSYC 672 (and PSYC 633) - Assessment and Treatment of Trauma
PSYC 632 - Foundation in Traumatology

Note: Northern Illinois University Trauma Study under Dr. Orcott. The NIU Trauma Study (NTS) was launched in response to the mass shooting at NIU on February 14, 2008.

Practicum Placements

Site Name
Trauma Services Clinic
Center for the Study of Family Violence and Sexual Assault
Trauma Service Center, Northern Illinois University (as part of our in-house training clinic)
Trauma Services at the Hines VA
County Probation Department (primarily assessment; many clients have a trauma history)

Note: The program offers other practicum placements where clients with trauma histories may be worked with, but that is not the focused population.

From website: "Trauma Psychology Focus - Trauma psychology is geared for students with strong research and clinical interests in the area of trauma. This focus area is based on the premise that trauma, broadly defined, is a risk factor in multiple disorders. Increased understanding of causes and consequences of traumatic stress and related sequelae will enhance the development of intervention strategies to reduce negative effects of trauma exposure. Consistent with the New Haven trauma competencies, training will target the core competencies of scientific knowledge about trauma, trauma-relevant psychosocial assessment, trauma-relevant psychosocial intervention and trauma-informed professionalism. You will receive exposure and training in best practices in assessment and evidence-based treatment modalities in trauma psychology. You will also produce original scholarship in trauma psychology."

Website: <https://www.niu.edu/clas/psychology/academics/graduate/clinical/trauma-focus.shtml>

Nova Southeastern University (Fort Lauderdale, FL)

Accredited by the APA? Yes (Ph.D. & Psy.D.)

Degree Program Level – M.S. in Forensic, Experimental, and General Psychology and Counseling; Ph.D. and Psy.D. in Clinical Psychology; Psy.D. in School Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Alexandru F. Cuc, Ph.D.	Cognitive psychology; conversational remembering; group dynamics; collective amnesia of traumatic events; autobiographical memories
Jennifer Davidtz, Ph.D.	Community mental health; the treatment of long-term mental illness, borderline personality disorder, and complex trauma; countertransference and other intersubjective psychotherapy process phenomena; psychotherapy integration
Jan Faust, Ph.D., ABPP	Child-clinical and pediatric psychology: child abuse (sexual and physical) and neglect; child treatment outcome research; PTSD in children and adolescents; child adjustment to acute and chronic medical conditions; lifespan psychosis
David Feldman, Ph.D.	Clinical and forensic psychology specializing with the deaf and hard-of-hearing; sexual offenders; competency; correctional psychology; psychology and the law; psychological evaluation and assessment; military psychology; psychology of leadership; combat and post-traumatic stress disorders
Diana Formoso, Ph.D.	Risk and protective factors that shape youth development within low-income, ethnic minority families; family conflict, parenting, and child outcome and how they are impacted by families' ecological and cultural context (e.g., economic hardship, neighborhood risk, immigration and acculturation); intervention development for ethnic minority children and families experiencing adversity; the family

	lives and school experiences of immigrant youth
Steven N. Gold, Ph.D.	Adult survivors of childhood sexual abuse; dissociative disorders; psychological trauma and post-traumatic stress disorder; sexual addiction; doctoral level clinical training; hypnotherapy; interpersonal, family, and systems theory and intervention; psychotherapy case conceptualization and treatment planning
Jeffrey L. Kibler, Ph.D.	Cognitive-behavioral regulation of emotion/mood disorders; Behavioral medicine: biobehavioral aspects of posttraumatic stress, psychosocial stress, and pain; psychosocial risks for illness (e.g., heart disease); health risk reduction; psychophysiology; minority health: predictors of biobehavioral research participation for individuals of racial minority
Stephen C. Messer, Ph.D.	Research methods; multivariable statistics, latent variable models, longitudinal design and analysis; diagnostic validity and measurement; developmental epidemiology and psychopathology; military psychology and combat-related PTSD
Scott Poland, Ed.D.	Professional experience has included leading national crisis teams and primary interests are suicide intervention, crisis intervention, youth violence, self-injury, school safety and delivery of psychological and counseling services in schools
Emily Salivar, Ph.D.	Couple processes and intervention; treatment dissemination and cost-effectiveness; underserved populations; impact of trauma on relationship functioning
Kayla Gurak Thayer, Ph.D.	Psychological treatment of severe psychopathology in adults during all phases of treatment; complex clinical presentations with psychiatric and medical comorbidities; recovery-oriented and evidence-based treatments; veteran and military populations; chronic and severe mental illness; culturally informed treatments; improving patient mental health outcomes; sociocultural variables and other treatment-related beliefs

	and behaviors that impact attrition or premature dropout from treatment
Vincent B. Van Hasselt, Ph.D.	Family and interpersonal violence; police psychology; criminal investigative analysis (psychological profiling) and apprehension; interviewing and interrogation techniques; cognitive behavioral interventions with juvenile offenders; behavioral criminology
Lenore Walker, Ed.D., ABPP (<i>Professor Emeritus</i>)	Forensic psychology; expert witness testimony; battered women syndrome; violence against women; family and interpersonal violence; sexual harassment; impact of trauma; posttraumatic stress disorder; feminist theory; gender violence especially battered women, sexual assault, sexual harassment, sex and human trafficking, false confessions of women, and child abuse
Amy Ellis, Ph.D.	Assistant Director of the Trauma Resolution & Integration Program; Trauma; PTSD
Tara Jungersen Ph.D., LMHC, CCMHC, NCC	Clinical supervision; intimate partner violence; trauma; treatment access for underserved populations; <i>the Survivor Therapy Empowerment Program</i> , a trauma-informed treatment program for survivors of gender-based trauma; Combining research and previous clinical experiences to bridge theory, practice, and community collaboration both inside and outside of the classroom
Vanessa B. Teixeira, Ed.D., LMHC, ACS	LGBT issues; TF-CBT; severe mental illness; supervision; gatekeeping; social justice; professional counselor development; the impact of early trauma on classroom behaviors
Mercedes Ballb�� Ter Maat, Ph.D., LPC, ATR-BC	Enhancing the quality of life of immigrant, minority families, and refugees in crisis by identifying risk and promoting protective factors through school- and community-based interventions
Scott Poland, Ed.D.	School safety, youth suicide, self-injury, bullying, school shootings, school crisis prevention/intervention, threat assessment, parenting in challenging times
Jonathan Banks, Ph.D.	The impact of acute and chronic stress on cognitive function and is examining mechanisms responsible for stress related working memory and executive functioning

	impairments; Interventions that may alter the impact of stress and impact cognitive functioning, including expressive writing and mindfulness meditation
Lisa Lashley, Psy.D.	Co-authored four books with topics such as <i>Neuropsychology of the Violent Offender</i> , <i>Learning Disabilities, Intellectual Disabilities</i> , and <i>The Intercorrelation of TBI and PTSD</i> ; Co-authored several book chapters ranging from sensory therapy in dementia to the neuropsychology of violence
Leonard Schnur, Psy.D., ABPP	Currently engaged with grant program, CREATE (Coalition for Research and Education Against Trafficking and Exploitation) affiliated with the Department of Health Science

Course Offerings

Course Name
PSY 4419 Forensic Psychology: Family Law (<i>Covers child physical & sexual abuse and domestic violence</i>)
PSY 4490 Military Psychology
PSY 4520 Child Sexual Abuse Assessment
PSY 4560 Forensic Assessment (<i>Trauma Symptom Inventory & Parenting Stress Index are also covered</i>)
PSY 4618 Clinical Applications of Hypnosis
PSY 4640 Special Problems in Psychotherapy (<i>Covers early trauma</i>)
PSY 4650 Crisis Intervention
PSY 4662 Post-Traumatic Stress Disorders
PSY 4673 Interpersonal Violence
PSY 4679 Abuse, Trauma, and Dissociation
PSY 4690 Psychological Interventions in Forensic Settings
PSY 4711 Police Psychology

Trauma Track: The object of the Trauma track is to deliver specialized training in trauma as it pertains to the assessment and treatment of individuals. In addition, research focused on trauma is encouraged.

Practicum Placements

Site Name
Multiple with potential for clinical experience in trauma - Ph.D. Clinical Psychology Practicum Palo Alto University

Trauma Emphasis: The learning objectives of the Trauma Area of Emphasis are aligned with the New Haven Core Competencies (Cook & Newman, 2014). The competencies broadly include foundational knowledge, a range of functional skills, and professional attitudes. Specifically, five areas are delineated as important to master through specialized education and training by those who work with trauma survivors: 1) scientific knowledge about trauma, 2) psychosocial trauma-related assessment, 3) trauma-focused psychosocial intervention, 4) trauma-informed professionalism, and 5) trauma-informed relational and systems. The Trauma Area of Emphasis uses a series of benchmarks to identify and to assess successful attainment of trauma competencies. In addition to course offerings, there are several requirements:

1. Research Requirement

Students who want to be competitive for obtaining a top tier internship should possess excellent writing and statistical skills and strive to publish papers and give presentations on trauma related topics while in graduate school. Students should be actively involved with a research group that is focused on trauma related projects.

2. Professional Development Requirement

Students in the Trauma Area of Emphasis are expected to actively take part in professional activities to advance their knowledge in the field. This includes student membership in the American Psychological Association, Division of Trauma Psychology (56) and regular attendance at the Palo Alto University Trauma Journal Club.

3. Dissertation Requirement

Students in the Trauma Area of Emphasis must complete a dissertation that makes a scientific contribution to the field of trauma psychology.

4. Practicum Requirement

In their 3rd or 4th year, students must complete an official practicum placement (one year of full or supplemental training) in a setting that includes a caseload of patients with PTSD or other trauma-related disorders in which trauma is the primary treatment focus.

5. Internship

A search of the APPIC site in May 2020 using the terms “trauma” and “PTSD” in the program description resulted in a list of 169 and 63 internship programs, respectively. Students are required to complete an internship in a setting that includes a caseload of patients with PTSD or other trauma-related disorders in which trauma is the primary focus for at least 33% of the total internship hours.

Ateka A. Contractor, Ph.D	Director of "Study of Traumatic Experiences, Signs, and Symptoms" Lab, which addresses research questions related to heterogeneity in traumatic experiences and corresponding PTSD symptomatology, mechanisms of PTSD's comorbidity with depression, impulse-based symptoms, substance use disorders and the role of cultural and personality influences in PTSD's symptomatology
Shelley Riggs, Ph.D	Family systems and intervention; trauma and loss; attachment processes through the life cycle; attachment theory; clinical issues.
Adriel Boals, Ph.D	Executive functioning and emotion; trauma memory and health; stress and memory.
Thomas Parsons, Ph.D	Clinical neuropsychology; neurocognitive and affective regulation following trauma and/or neurological illness; virtual environments and artificial neural networks

Course Offerings

Course Name
PSYC 6630 - Series on Psychotherapy Theory, Research and Practice

Practicum Placements

Site Name
The Psychology Clinic at the University of North Texas

Website: <https://psychology.unt.edu/>

University of Notre Dame (Notre Dame, IN)

Accredited by the APA? Yes

Degree Program Level -

Psychology graduate Ph.D degree program with specializations in Clinical Psychology, Cognition, Brain, and Behavior, Developmental, and Quantitative Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
David Watson, Ph.D	Structure and measurement of personality, affect, and psychopathology, as well as examining how personality traits relate to clinical disorders; depression, anxiety disorders, posttraumatic stress disorder, obsessive-compulsive disorder, mania, personality disorders, and dissociation
Laura Miller-Graff, Ph.D	Director of BRAVE (Building Resilience After Violence Exposure) Research; Interests include developmental effects of exposure to violence in childhood, children who have multiple traumatic exposures, patterns of resilience and psychopathology, including the development of posttraumatic stress symptoms; adaptation and evaluation of trauma assessment and treatment in LMIC and conflict-affected settings. Current research projects include the effects of intimate partner violence (IPV) on women and children's health and adjustment in the perinatal period factors contributing and the adaptation, development and evaluation of psychological interventions for violence-exposed pregnant women and for families living in settings of chronic violence.

Course Offerings

Course Name
PSY 60691/40691 Conceptualizing resilience in contexts of chronic violence

Website: <https://psychology.nd.edu/>

University of Oregon (Eugene, OR)

Accredited by the APA? Yes

Degree Program Level - Ph.D Counseling Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Jennifer Freyd, Ph.D	the causes and impact of interpersonal violence and institutional betrayal on mental and physical health, behavior, and society; betrayal and its antidote at the institutional

	level: institutional betrayal and institution courage. Current projects include studies of campus and workplace sexual assault and harassment, minority discrimination, gender and sexual orientation, disclosures of abuse, physical and mental health distress, and institutional betrayal and institutional courage.
Jeffrey Toadal, Ph.D	Violence prevention and community engagement as a vehicle for reducing child abuse
Atika Khurana, Ph.D	Understanding and preventing maladaptive risk-taking during adolescence, including substance abuse and dependence, sexual risk-taking, aggression, and academic disengagement; Examining media and technology effects on adolescent health and risk behaviors, in the context of personality factors (e.g., impulsivity, sensation seeking) and parenting behaviors
Krista M. Chronister, Ph.D	Impact of partner violence on adolescent and adult vocational and economic development, and preventive interventions designed to prevent and remedy the impact. Professor Chronister also focuses on partner violence, and culturally-specific prevention and intervention strategies, in Spanish-speaking Latinx and Filipino communities;

University of South Dakota Clinical Psychology Training Program (Vermillion, SD)

Accredited by the APA?

Degree Program Level – Ph.D. in Clinical Psychology, specialization in Clinical/Disaster Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Chris Berghoff, Ph.D.	<p>Dr. Berghoff's research evaluates the relation of acceptance and mindfulness processes to the formation and maintenance of anxiety- and trauma-related disorders, and how these difficulties may impact physical health. Through this work, he attempts to clarify how such processes influence behaviors in everyday life using daily diary and other intensive assessment procedures. Anchored in cognitive behavior theory and treatments, his clinical and research efforts provide mindfulness meditation, Acceptance & Commitment Therapy, and other acceptance-based behavioral interventions to participants and patients, with the aim of alleviating human suffering.</p>
Beth Boyd, PhD.	<p>As a faculty member in the USD Disaster Mental Health Institute since 1993, I have responded to numerous national and international disasters and crisis situations, particularly in Native American communities. My work with tribes has focused on crisis response team development, youth suicide prevention, community healing and empowerment, and human resource development. I am skilled in both qualitative and quantitative culturally competent methodology and have served as a research consultant to a number of tribes or tribal groups. As I am a strong proponent of community-based participatory research, my research activities tend to be tribal community-initiated projects--this often includes community needs assessments and evaluation of tribal programs.</p>

Jean Caraway, Ph.D.	Dr. Caraway has worked in the area of interpersonal violence for over 20 years. Her research interests include the effects of interpersonal violence and risk factors for PTSD and/or other mental health issues. She also has been a long standing advocate for diversity issues. Her research in this area has explored mental health issues for members of disenfranchised groups such as those who identify as children and families with disabilities, gender minority groups, and racial and cultural minorities.
BreAnne Danzi, Ph.D.	My interests broadly focus on the mental health of children and families, especially those impacted by stress and trauma. My research focuses on understanding children's responses to traumatic stress, improving the assessment of PTSD in children, and identifying biopsychosocial factors (e.g., genetics, social support) that contribute to risk and resilience trajectories following trauma exposure. My work has historically focused on community-wide trauma (e.g., natural disasters, terrorism), but I also study other forms of stress (e.g., peer victimization, transitions). I am particularly interested in assessment and diagnostic issues in children, and my recent research has focused on improving the diagnostic criteria for PTSD to be more developmentally-sensitive to clinical presentations in trauma-exposed children.

Course Offerings

Site Name
PSYC 754 Behavior Therapy
PSYC 778 Crisis Intervention
PSYC 780 Rural Community Psychology
PSYC 784 Disaster Mental Health
PSYC 785 Traumatic Stress
PSYC 787 Serving the Diverse Community in Disaster
PSYC 755 Management in Disaster Mental Health
PSYC 757 Directed Readings in Disaster Psychology
PSYC 758 Directed Research in Disaster Psychology

Disaster Mental Health Graduate Certificate

<https://www.usd.edu/usd-online/online-programs/certificate-in-disaster-mental-health>

This graduate certificate is intended to prepare mental health professionals to serve their communities in preparing for, responding to and recovering from disaster, terrorist attacks and public health emergencies.

Specialization in Clinical/Disaster Psychology: 21 credit hours

The Doctoral Specialization in Clinical/Disaster Psychology requires 12 credit hours of coursework in the disaster psychology area in addition to completion of 9 credit hours of coursework that double counts from PSYC 780 (3 credit hours), PSYC 754 (3 credit hours), and by completing a Clinical/Disaster Psychology elective from the designated list (3 credit hours) and all course requirements for the Specialization in Clinical Psychology (as described above).

University of Texas at Austin (Austin, TX)

Accredited by the APA? Yes

Degree Program level – Ph.D. program in Clinical Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Michael Telch, Ph.D.	Treatment of trauma and PTSD. Current projects include enhancing exposure therapy for PTSD and anxiety (see www.utanxiety.com) for additional information

Course Offerings and Practicum Placements

The University of Texas at Austin clinical psychology program is based on the clinical science-training model. Our primary goal is to prepare students for careers in research and teaching. To inform this goal, we integrate research training with training in evidence based clinical practice, including a focus on empirically supported treatments. The program offers a broad range of opportunities for research, clinical training and teaching, including research on the nature and treatment of post-traumatic stress disorder, anxiety and phobias; training in the treatment of anxiety-related disorders; and clinical experiences in a variety of settings including, but not limited to, sites focused on the treatment of trauma survivors such as an outpatient VA clinic and the Center for Survivors of Torture.

University of Toledo (Toledo, OH)

Accredited by the APA? Yes

Degree Program Level - Ph.D. Clinical Psychology

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Jon D. Elhai, Ph.D	Assessment, Mechanisms and treatment of posttraumatic stress disorder, Cyberpsychology and internet addictions
Mojisola Tiamiyu, Ph.D	Clinical-community psychology, Chronic illnesses, resilience, and post-traumatic growth Cross-cultural psychology
Matthew T. Tull, Ph.D	Emotion regulation and PTSD PTSD and maladaptive behavior (risk-taking, substance abuse, suicidal and nonsuicidal self-injurious behaviors) Experimental psychopathology

Research Practicum (Psy 7030) may involve participation in the Posttraumatic Stress Disorder Lab under Dr. Elhai. Research in this area includes traumatic event exposure and posttraumatic stress disorder (PTSD). The website notes that Dr. Elhai's specializations include:

- *Understanding PTSD's symptom structure*
- *Exploring PTSD's high comorbidity with other mental disorders*
- *Assessment and measurement of traumatic event exposure and PTSD*
- *Mechanisms underlying the development of trauma-related pathology*

University of Tulsa (Tulsa, OH)

Accredited by the APA? Yes

Degree Program Level – Ph.D.

Faculty Members with Research Interests in Trauma

Faculty Member	Research Interests
Joanne Davis, Ph.D.	The director of the Trauma Research: Assessment, Prevention, and Treatment Center and co-director of The University of

	<p>Tulsa Institute of Trauma, Adversity, and Injustice. Dr. Davis developed Exposure, Relaxation, and Rescripting Therapy (ERRT) for trauma-related nightmares. Her research continues to focus on nightmares and sleep problems in trauma-exposed individuals, and she has multiple grants examining effectiveness of consecutive and combined treatment for posttraumatic stress disorder and trauma-related nightmares.</p>
Lisa Cromer, Ph.D.	<p>The prevention and treatment of psychological trauma that can be experienced in response to adverse life experiences. Dr. Cromer is passionate about social justice and works to build human resilience to adversity in at-risk and disadvantaged populations. Much of Dr. Cromer's prevention work is focused within systems. She has worked with college athletes, first generation college students, trauma-informed schools, students and student athletes transitioning to college, and military families preparing for deployment. Her expertise extends to the prevention of the intergenerational transmission of trauma and fostering healing from historical trauma. Dr. Cromer's work is applied in the sense that she actively works to improve outcomes for the people with whom she works. Dr. Cromer's prevention work is based in attachment, self-regulation, and empowerment.</p>

Utah State University (Logan, UT)

Accredited by the APA? Yes

Degree Program level - PhD

Research Opportunities, Course Offerings, and Practicum Placements

Utah State University offers a Ph.D. in combined Clinical/Counseling Psychology. Trauma-specific training is focused on military veterans and ethnic and racial minorities, and instruction is offered primarily through the labs of Dr. Rebecca Blais and Dr. Melissa Tehee. Students can complete a variety of clinical opportunities to grow their skills working with traumatized individuals. Placements focusing on trauma work include but are not limited to the VA, Utah Center for Evidenced-Based Treatment, and the Sorenson Center of Clinical Excellence Behavioral Health Unit. Students will have the opportunity to learn Prolonged Exposure, Cognitive Processing Therapy, group and marital therapy, Acceptance and Commitment Therapy, and Parent Management Training.
